Comfort  
&  
Design.**

## **Produce high quality stainless steel faucets in different surface treatment**

Nivito is a Swedish production company with a innovative design and at the same time a long experience in the HVAC industry. Nivitos faucets are made of 100% solid stainless steel, which means an unlimited surface and acid resistance. Stainless steel is more than twice as durable as brass and is an unbeatable materials from an environmental and quality standpoint.

Nivito focus exclusively on the latest technology in our mixers, both for function and environment. Our method of quality assurance is carefully designed and optimized to achieve the best quality.

### **Why do we use stainless steel?**

Stainless steel is used in all kitchen equipment that has direct contact with food. There are two primary reasons why stainless steel is used. The first is that it does not contain any unhealthy substances for the human body, the second is that stainless steel are an extremely durable material that is 100% solid all the way through.

Stainless steel is the optimum material on the market. The process for the production of stainless steel is the most advanced on the market, the melting point is over 1700 degrees.

To achieve the highest quality and be sure that you can use the products every day in almost non-existent time, is now stainless steel faucet here to stay.

## **Nivito stands for innovation, comfort and design.**
